Date: march 15, 2018
Project Name:
Professionals portal Kies de beste Band

Plugins:
Can you use Gravity forms instead of Contact form 7?
I have a license

Queries
1.What is main language of the website?
> Answer: Dutch = main

2. Do we need to localize the project and custom field in backend also or just make the website supportable with the main language in frontend?

> Answer: In backend = make it so that is is easy for me to translate. Is that possible?

3. The multicolor card of campaign category card will be the image rather than admin to choose multiple color from color wheel while adding the content?

> Answer: image

4. Please elaborate the section from brief PDF, page no. 2, Section – Download, Paragraph - 6 "Downloads clicked from the download overview do not have pages behind them, with the exception of campaign resources (represented by the colored cards at the top of the overview page). Campaign resources can range from banner ads to social media images to video files. Therefore, after clicking a campaign-card, the user will be taken to a separate download-overview showing only resources pertaining to said campaign."

>Answer: So when you click PDF download starts, instead of opening a single page first

5. How the Poster Generator function will work?
> Answer > I have a Gravity forms existing solution. So I will implement it myself.
